Walter:

25X1A

The attached sub-committee report to [REDACTED] sets forth the priority of projects to be undertaken in this field by the agencies.

25X1A

[REDACTED] reports that preliminary work is under way on item a. [REDACTED] asked him to keep us informed, and he has done so. At present he is seeking from the service agencies some pinpointing of "important facilities" so that a specific study can be prepared. He asked whether we would like to coordinate and otherwise handle the requirements upon the agencies in this connection. I told him I felt that it would be enough if we were kept informed as to progress, and that he could much more effectively work through the committee machinery in seeking fulfillment of the requirement. I trust that you agree. He seemed to feel that this would be the most efficient way of handling it.
